**GENERAL INFORMATION**

**HOME PAGE**

The new home page is arranged to provide immediate access to all products and services provided by RWT. The top menu row with the orange accents provides navigation to areas of the website to schedule training, request classroom training, purchase training material and purchase on-line training. The second menu area provides information about RWT, contact information, news, answers to questions and our privacy policy. You can also navigate to our products using visual navigation in the section of the page.
COMPANY

Information about RWT’s mission, focus and team composition.

Our Company

Our Mission
To provide a wide variety of high-quality safety, compliance and technical training, targeted services and products to the railroad industry, including railroads, transit systems, short lines, regional railroads, railroad contractors, suppliers, and consultants. We offer a wide range of consulting and support services to our clients. Call us at 866-479-8462, M-F, 8-4 EST, to discuss your training or support service requirements.

Our Focus
The railroad industry is a well-defined industry through various rules and regulations. We help to clarify these terms and provide guidance on what you need and when. We collaborate with your organization to ensure content is relevant, delivery is timely, and materials are engaging and effective. Years of service in the railroad industry have instilled in the RWT team an unwavering commitment to safety. Our services and training are always delivered with a special emphasis on employee safety and the safety of your operation or project.

Our Team
The staff at RWT is comprised of experienced railroad professionals who bring a wide range of practical railroad knowledge and experience and who deliver all services from the perspective of a professional railroader. The RWT veterans have honed their skills in planning, developing, implementing, and managing a wide variety of railroad services on several major railroads and in a variety of departments and positions, along with valuable experience in railroad consulting, as suppliers, contractors, and with regulatory agencies. All have come to us

FREQUENTLY ASKED QUESTIONS
As users have questions, we will publish the questions and answers here.
PRIVACY POLICY

Privacy is a concern to everyone. This document states how and when your information will be used or shared.

NEW ACCOUNT REGISTRATION

New users can register on the website with your email address and other information. In the company field, you will be provided options of company names currently in the system. You can set your own password.
LOGIN

Use your email address and password to access the system. You will have access to products based on the role assigned in the system.

LOGIN ERROR / RESET PASSWORD

If you cannot access the system using your email address and password, you will see an error message with a link to reset your password.
Facilitator Training

Calendar and List

Select Facilitator Training from the top menu to see a calendar view of the training available each month with a list on the right showing upcoming training sessions. You must log in to purchase this training.

Select Session

Click on the session you want and a popup will appear with the full description of the class. Calendar colors make finding the course you want easier. You may register multiple people.
**Set Quantity**
If the class shows Upcoming, to the right of the class name, you can select one or more seats in the class. Confirm the class type, date and quantity is correct, then click Register now to complete the purchase. Note: Expired will be displayed instead of Upcoming if registration is closed.

**Register Attendees**
You must enter name, email and address for each student being registered. If a student is not in the system, they will be registered and notified via e-mail to complete their registration in the system.
**ERROR MESSAGES**

All fields on the form are required and you will see a highlighted area indicating the field that is missing information or incorrect. You must review the RWT privacy policy check the consent box to make payment.

---

**REVIEW PURCHASE**

Review your purchase information including the number of seats for the course. Credit, debit and purchasing card payments are accepted. Scroll down to enter credit card information.
**Enter Payment Information and Complete Purchase**

Purchaser information will be pre-populated, but you will need to enter credit card information into our secure payment gateway. The address and zip code must match the information associated with the card you are using.

---

**Purchase Thank You**

MY SEMINARS
After purchase of Facilitator training, details about the training is listed in the My Seminars section of My Account. Click on link for all details about the training and location. You can update attendee information by clicking on the gear icon.
Classroom Training

Training Services

Classroom training for your organization can be requested at a location of your choice. The training coordinator will review the request and schedule a facilitator to conduct the training. There are five training categories including Industrial, Mechanical, Transportation, Engineering and General Safety.

Industrial

Introduction to Railroad Safety Concepts
Industrial Locomotive Operator Training
Freight Car Air Brake Training
Train Accident Investigation
Operating Rules & Practices
Audits and Assessments

Learn More

Mechanical

FRA Freight Car Safety Standards (49 CFR 215)
FRA Locomotive Safety Standards (49 CFR 229)
FRA Brake System Safety Standards (49 CFR 232)
FRA Railroad Safety Appliance Standards (49 CFR 231)

INDUSTRIAL

Introduction to Railroad Safety Concepts

Developed for in-plant switching operators this one-day course includes a description of basic track components and geometry, basic locomotive and freight car designations and components including air brake components and functioning, safe job procedures for the rail environment and basic derailment modes and derailment prevention. This course includes both classroom instruction and a field demonstration. Coming soon, it will also be available online.

Request Training

Industrial Locomotive Operator Training

Designed for the operator of the locomotive in plant switching operations this course includes modules covering locomotive familiarization, the diesel engine, starting the locomotive and preparing it for service, locomotive control panels, air compressor and main retection, locomotive brakes, freight car air brakes and wheelset dynamics.

Request Training

Freight Car Air Brake Training

This one-day course presents a detailed description of the functioning of the locomotive and freight car air brake system, as well as the inspection and testing of the air brake system by rail crews, prior to equipment movement. It included both classroom instruction and field exercises.
MECHANICAL

FRA Freight Car Safety Standards (49 CFR 215)
Designed for individuals responsible for the inspection of freight cars and making compliance determinations, this training will acquaint the student with the freight car safety standards prescribed by Federal Regulation as well as the means to detect deviations from these standards and how to determine if the car can be safely moved for repair.

FRA Locomotive Safety Standards (49 CFR 229)
Designed for individuals responsible for the inspection of locomotives and making compliance determinations, this training will acquaint the student with the locomotive safety standards prescribed by Federal Regulation as well as the means to detect deviations from these standards and how to determine if the locomotive can safely continue in service.

FRA Railroad Safety Appliance Standards (49 CFR 232)
This course is designed to meet the training requirements mandated by Federal Regulation for railroad employees and contractors who perform brake system inspections, tests or maintenances, and includes both classroom and "hands-on" components. Student's possession of the appropriate skills and knowledge is documented through a written examination and a "hands-on" demonstration.

TRANSPORTATION

New Hire Training (Train, Engine & Yard Service)
RWT can provide unparalleled instruction to teach foundational operating skills including Safety Rules, Operating Rules, Air Brake & Train Handling Rules and Hazardous Materials Rules. With over 5000 man-days of experience in new hire training, our instructors can use a client's existing curriculum or RWT can assist in curriculum development.

Locomotive Engineer Training (49 CFR 240)
RWT instructors have extensive field and classroom experience as Certified Locomotive Engineers, DSLT's and Engineer Instructors and have provided over 1000 man-days of training for our clients. They are qualified as the requirements of the 240 and, in addition to training, can evaluate Engineer performance and prescribe appropriate remedial activity for performance failures.

Remote Control Locomotive Operator Training (49 CFR 240)
With over 12,000 man-days of RCL experience, RWT has assisted clients in developing RCL training programs, in assessing sites for potential conversion from conventional operation to remote control operation, in evaluating and implementing Remote Control Zones and in training and certifying Remote Control Locomotive Operators using the latest RCL technologies.
**ENGINEERING**

**FRA Track Safety Standards (49 CFR 213)**
Designed for individuals responsible for the inspection and maintenance of track, this training will acquaint the student with the Track Safety Standards prescribed by Federal Regulation, as well as the means to detect deviations from those standards and prescribe appropriate remedial action to correct, or safety compensate for, those deviations.

**FRA Roadway Worker Protection (49 CFR 214)**
Designed for individuals performing track construction and maintenance (Roadway Workers), this training covers the requirements prescribed by Federal Regulation, for initial and recurrent training on the on-track safety rules and procedures that these individuals are required to follow.

**FRA Bridge Worker Fall Protection (49 CFR 214)**
 Designed for individuals performing work on railroad bridges, this training familiarizes the student with the minimum safety rules required by Federal Regulation for fall protection systems and their application.

**FRA Track Safety Standards (49 CFR 213)**
Designed for individuals responsible for the inspection and maintenance of track, this training will acquaint the student with the Track Safety Standards prescribed by Federal Regulation, as well as the means to

**GENERAL SAFETY**

**General Safety Training**
Generations of experience in the Rail-road industry keeps RWT’s ability to work with the Client to develop and/or train employees in the concepts of basic Railroad Safety.

**Operating Rules Training**
RWT’s experience and knowledge allow us to help develop and customize Operating Rules Training Programs that are tailored to specific User Groups, emphasizing the rules pertinent to the individual’s role and position.

**MOW New Hire & Technical Training**
Through a combination of Classroom and Field sessions, we are able to introduce the new Railroad Employee to the Railroad environment and their role relative to its distinct requirements pertaining to maintenance, inspection, and operations. Also, we offer more Technical Training specific to various job functions, such as Track Inspection and Maintenance, etc.

**Signal & Communication Operational Safety Training**
Using Client historical data, we help develop annual training that focuses on their actual experiences, the most recent analysis, and remedial actions taken. This can then provide the basis for any additional training.
CLASSROOM TRAINING REQUEST

When you request classroom training, your class selection is set when you click Request Training. If you click railroad specific training such as Roadway Worker Protection, you will have an additional selection area to select the railroad. Enter the number of attendees and first and second choices for training dates. The dates must be at least two weeks out from the date the form was submitted.

TRAINING LOCATION AND CLASS REQUESTED

Enter the training location including name of facility and complete address.
**MATERIALS**

**PURCHASE MATERIALS**

Training materials are usually purchased by facilitators who have received our Facilitator training. Railroad specific training manuals can only be purchased for the years the facilitators certified.

2019 Roadway Maintenance Machines

Roadway Maintenance Machines and Hi-Rail Vehicles

Designed for Railroads, Railroad Employees and Railroad Contractors performing work involving the operation, maintenance and inspection of On-Track Roadway Maintenance Machines and Hi-Rail Vehicles. This course will familiarize the student with the Federal Railroad Administration Regulations regarding On-Track Roadway Maintenance Machines and Hi-Rail Vehicles with which they may be required to comply.

The purpose of these regulations is to prevent accidents and casualties arising from the improper operation, maintenance and inspection of On-Track Roadway Maintenance Machines and Hi-Rail Vehicles. This course is primarily based on Regulations promulgated by the Federal Railroad Administration under 49 CFR 214, Subpart D, On-Track Roadway Maintenance Machines and Hi-Rail Vehicles.

Click on the link below to view a detailed description of the course and instructions regarding how to take the course.

You must review these instructions in order to proceed.
